

CASK

GENERAL CHANGES:

- Ensure all sections fit into the screen panel in a proportionate manner
- Ensure all left aligned sections start n end at the same place...same for centrally aligned as well as right alignment (if any)
- Ensure All Text, Icons, Graphics are visible with the same level of quality in the white as well as dark mode.
- Ensure All pages are proportionate n maintain a sizable ratio with each other

1] Landing Page

- Transparent Bg Logos of CASK both black n white are given on the landing page please ensure its added ...also enlarge the size of the logo
- The white strip consisting of the logos of meity, certin and cyber buddhas must be a little thicker and fit into the landing page hence u can readjust it to come a little up.
- Please Increase the size of the three logos on the white strip such that it is visible.

2] What is Cask ?

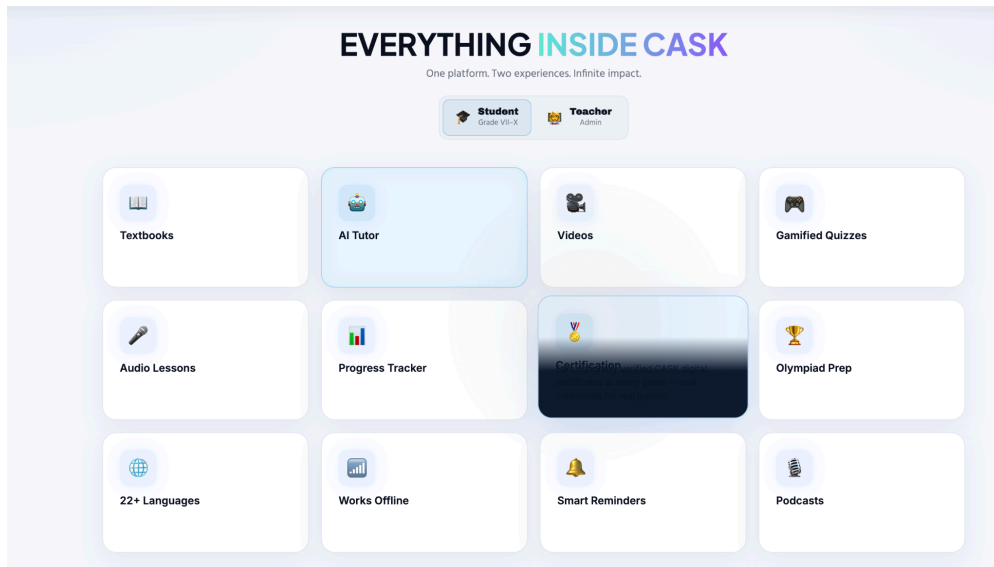

- Ensure the Audio Button works...it should open to a muted video but if the user wants to listen to the audio n presses on the audio button it should play the voice.
- Alignment of the video box on the right (ie from where it starts to where it ends) Should be equivalent to the start n end point of the text on the left side (i.e from "The Platform" ... "to Grade X")

3] Four Years, Four Transformations

- In white mode, there is text that goes invisible please identify the text n bring it to a color scheme wherein it's visible.
- There is a small circle ball running through the lefthand side corner on a ring please ensure that ring is visible n the circle is visible as well in the light mode

4] Everything Inside Cask

- The Below Image is a representation of what is happening when the tab is hovered upon in white mode...The subtitle text explaining the feature is not visible please ensure the box fully turns white such that the text is visible.

- Even in dark mode..when hovered upon the subtitle text is overlapping with the icon in the header of the box please ensure the subtitle text is readable completely.
- AI TUTOR N CERTIFICATION HAVE A CERTAIN GLOW EFFECT TO THEM. Please give the same to all the boxes not just these two. Ensure this glow effect is amplified along with a shadow effect on the boxes (like a double layer effect)

MULTILINGUAL

- Ensure this section fits into the screen panel
- Each of the language bubbles must, when hovered upon, reflect the change in the statement box of “ How do i know if a upi request is fake” .
- Bring the language bubbles into a single line n let them be floating n interactive

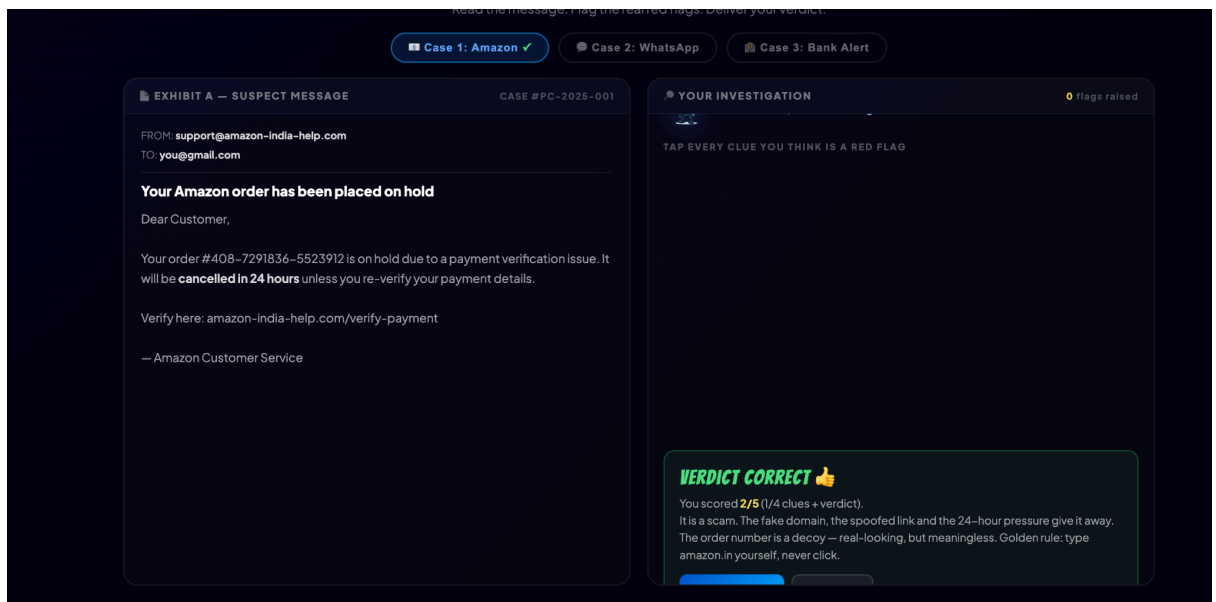

FOUR YEARS, FOUR MILESTONES

- Ensure the glass effect that exists in the dark mode is prevalent and the very same in the white mode...also ensure the badges inside the glass frames are in contrast with the white mode when switched into it.
- Once again ensure this section fits into one screen altogether. That is the lower panel also fits into the picture frame.

THE PHISH & CHIP SHOW

CHANGES:

- Ensure all sections fit into the screen panel in a proportionate manner
- Ensure all left aligned sections start n end at the same place...same for centrally aligned as well as right alignment (if any)
- Ensure All Text, Icons, Graphics are visible with the same level of quality in the white as well as dark mode.
- Ensure All pages are proportionate n maintain a sizable ratio with each other
- Ensure the webtrap section fits into the screen
- Ensure the whole page is also working in light mode
- Ensure the verdict section comes above.eliminate this space gap that occurs when the game has ended between the verdict and the game tab. A reference of what is occurring is given in the screenshot provided below

-
- Ensure Chips Detective Lab fits onto the screen panel.
